

About us

KIMS & RC ADR app is an android tool developed by the department of Pharmacology KIMS & RC with the IT expert for online reporting of ADR for the faculties & staff of Karpaga Vinayaga Institute of Medical sciences & Research Centre to report ADR in KIMS & RC campus. This app use is restricted to faculty and staff of Karpaga Vinayaga Education group (KVEG).

In India, under CDSCO (Central Drug Standard Control Organization) National Pharmacovigilance Programme of India was established with an aim to aware medical and paramedical fraternity about importance of reporting of ADR. National coordinating centre (NCC) is at Allahabad which is linked to all over India through Zonal, peripheral monitoring centres which receive ADR reports all over from India. NCC also work in coordination with Global ADR Monitoring Centre (Uppsala Monitoring Centre) situated at Sweden and place its contribution in global data collection.

We, department of pharmacology feel that reporting ADR for clinicians is difficult due to their busy work schedule. So, we came with the idea of online app which will be very handy for all staffs of KVEG to report about ADR occurring in our hospital. We urge all the staff to report ADR & contribute in safeguarding population.
Thank You.
